

PRESS RELEASE

Berlin, September 2010

The constitutional complaint lodged in June against the Euro stabilisation mechanism and against the financial assistance of Greece under the responsibility of Markus C. Kerber, Professor at Berlin University, received a significant support from the German civil society and industry.

24 personalities of corporate Germany give their explicit backing by formally joining the procedure led by Kerber in the Constitutional Court of Karlsruhe. The President of this group of entrepreneurs, Mr. Patrick Adenauer (a grandson of former chancellor Adenauer) expects a legal clarification by the procedure.

Moreover Kerber has sent in an additional writ to the court to give substantial evidence about the breach of the European Treaty by Mr. Trichet's European Central Bank (purchase of State bonds from Spain, Greece etc.).
