

Press Release

Brussels continues harassing Germany on exports

Berlin, December 3rd, 2013

The decision of the commission to monitor the German export surplus is not only a proof the Commissions national bias but a strike against German democracy. The endorsement of France's draft budget plans for 2014 – despite the total lack of efforts for fiscal adjustment – reveals on the other hand the partiality of the commission.

The Europolis group was the only ESM complainant that made the legal basis of such monitoring (Regulation (EU) No 1176/2011) a subject matter of the constitutional complaint. Prof. Kerber, attorney of the Europolis group, has submitted a writ to the German Constitutional Court, in which the intervention of the Brussels Commission in national economic policy is severely criticized.
